

# City of Goodyear Community Advisory

July 2017

- **What:** Groundwater monitor well, used to collect water levels and groundwater samples for laboratory analysis.
- **Where:** City of Goodyear right-of-way on North Las Palmas Drive, north of East Loma Linda Boulevard.
- **When:** Construction activities are scheduled to begin July 10, 2017 from approximately 6 a.m. to 6 p.m.; construction activities can last approximately three to four weeks total with the drilling lasting about two weeks.
- **How You May Be Affected:** Businesses and residents should expect some noise during the construction activities and are asked to abide by the traffic signs and barricades in the area. Efforts will be made to cause the least disruption to businesses and residents. A chain-link fence may surround the work area during construction for safety purposes.

**History:** Crane Co., the owner of the former Unidynamics facility on Litchfield Road, is ordering the testing of the groundwater to determine the impact of chemical disposal practices decades ago at the former defense industry facility.

## THERE IS NO THREAT TO YOUR DRINKING WATER.

Additional site history is available on the EPA website at:
