City of Goodyear Community Advisory

September 2019

- **What:** Drilling, installation, and development of one groundwater injection well (IA-19).
- **Where:** Eastern shoulder of N. 145th Avenue north of W. McDowell Rd., in City of Goodyear right-of-way.
- **When:** Well drilling and installation activities are expected to last a total of approximately one to two weeks starting on September 9, 2019. Construction hours are generally planned between 7:00 a.m. and 5:00 p.m. on weekdays. Barricades may remain up on a 24-hour basis during the project. Another Community Advisory will be sent for additional activities such as pipeline and well vault installation.
- **How You May Be Affected:** Businesses and residents should expect some noise during the construction activities and are asked to abide by the traffic signs and barricades in the area. Efforts will be made to cause the least disruption to businesses and residents. Two-way traffic will remain open on N. 145th Avenue.

History: Crane Co., the owner of the former Unidynamics facility on Litchfield Road, with oversight from EPA and the Arizona Department of Environmental Quality, is ordering the testing of the groundwater to determine the impact of chemical disposal practices decades ago at the former defense industry facility.

THERE IS NO THREAT TO YOUR DRINKING WATER.
